***Welcome to EngravePro and thank you for your interest in our product...***

Thank you for your interest in reselling one of the finest product add-ons ever created for CorelDRAW®. We feel EngravePro really enhances CorelDRAW® by adding valuable tools otherwise only offered in dedicated engraving packages and for a lot less money. Below we have outlined reseller discounts and reseller guidelines concerning the resale of our software. Please review the information and submit to us any comments .or questions you may have. Most importantly however, fill out the short questionnaire so we may add you to our list of resellers to ensure proper credit to your account. Once again, Welcome.

First and foremost there are no territories. Resellers may resell the software anywhere and to whomever the reseller pleases.

Each software license sold includes two computer installations within the same company. This means if John's Engraving House has two lasers running on two PC's we will unlock both of them. This does not mean, John's Engraving House can install one copy and give the second license to another company, friend or subsidiary of the parent company. We also do not discount the software further simply because a company has only one computer.

Technical support is offered on a case by case basis. Normally if the customer has an issue with the software they can first contact the reseller if they prefer, however that is not necessary. Customers may contact EngravePro, LLC. directly.

Software Service packs or "bug fixes" are free to download from the EngravePro website. If the customer wants a CD mailed to them there is a nominal charge as outlined in the charges section of this document.

Printed documentation is available at an additional charge. See the charges section for current pricing.

Software will not be unlocked until EngravePro, LLC. has confirmed receipt of payment either by the reseller or itself.

We do not offer a revolving credit account. Payment for software is expected by the first of the month following the sale of the software if the reseller is a recognized distributor of a major laser manufacturer. See the section titled, "Recognized Laser Manufacturer". If you are not a laser reseller payment is expected with 7 business days of purchase. In the event of non- payment the company the software was unlocked for will be notified via first class certified mail that payment has not been received and that they are in violation of the Software Piracy Act. The reseller will also be barred from selling the software.

The list below represents what EngravePro, LLC. considers to be established laser manufacturers and/ or distributors. EngravePro, LLC. reserves the right to add or remove members from this list as they deem

necessary. If your company is not listed please forward the name, address and website address to EngravePro, LLC.
